PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe and handy place for future reference.

For the AC adaptor

WARNING

- This AC adaptor is designed for use with only Yamaha electronic instruments. Do not use for any other purpose.
- Indoor use only. Do not use in any wet environments.

CAUTION

- When setting up, make sure that the AC outlet is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch of the instrument and disconnect the AC adaptor from the outlet. When the AC adaptor is connected to the AC outlet, keep in mind that electricity is flowing at the minimum level, even if the power switch is turned off. When you are not using the instrument for a long time, make sure to unplug the power cord from the wall AC outlet.

For the instrument

WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

Power supply/AC adaptor

- Do not place the power cord near heat sources such as heaters or radiators. Also, do not excessively bend or otherwise damage the cord, or place heavy objects on it.
- Only use the voltage specified as correct for the instrument. The required voltage is printed on the name plate of the instrument.
- Use the specified adaptor (page 10) only. Using the wrong adaptor can result in damage to the instrument or overheating.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.

Do not open

- This instrument contains no user-serviceable parts. Do not open the instrument or attempt to disassemble or modify the internal components in any way. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

Water warning

- Do not expose the instrument to rain, use it near water or in damp or wet conditions, or place on it any containers (such as vases, bottles or glasses) containing liquids which might spill into any openings. If any liquid such as water seeps into the instrument, turn off the power immediately and unplug the power cord from the AC outlet. Then have the instrument inspected by qualified Yamaha service personnel.
- Never insert or remove an electric plug with wet hands.

Fire warning

- Do not put burning items, such as candles, on the unit. A burning item may fall over and cause a fire.

Influences on electro-medical

- Magnetism may affect electro-medical devices.
 - Do not use this product near medical devices or inside areas in which the use of radio waves is restricted.
 - Do not use this product within 15cm (6 in.) of persons with a heart pacemaker or defibrillator implant.

Battery

- Follow the precautions below. Failure to do so might result in explosion, fire, overheating or battery fluid leakage.
 - Do not tamper with or disassemble batteries.
 - Do not dispose of batteries in fire.
 - Do not expose a battery to high temperatures, such as direct sunlight or a fire.
 - Do not attempt to recharge batteries that are not designed to be charged.
 - Keep the batteries separate from metallic objects such as necklaces, hairpins, coins, and keys.
 - Use the specified battery type (page 10) only.
 - Use new batteries, all of which are the same type, same model, and made by the same manufacturer.
 - Always make sure all batteries are inserted in conformity with the +/- polarity markings.
 - When the batteries run out, or if the instrument is not to be used for a long time, remove the batteries from the instrument.
 - When using Ni-MH batteries, follow the instructions that came with the batteries. Use only the specified charger device when charging.
- Keep batteries away from small children who might accidentally swallow them.
- If the batteries do leak, avoid contact with the leaked fluid. If the battery fluid should come in contact with your eyes, mouth, or skin, wash immediately with water and consult a doctor. Battery fluid is corrosive and may possibly cause loss of sight or chemical burns.

If you notice any abnormality

- When one of the following problems occur, immediately turn off the power switch and disconnect the electric plug from the outlet. (If you are using batteries, remove all batteries from the instrument.) Then have the device inspected by Yamaha service personnel.
 - The power cord or plug becomes frayed or damaged.
 - It emits unusual smells or smoke.
 - Some object has been dropped into the instrument.
 - There is a sudden loss of sound during use of the instrument.
 - If any cracks or breakages exist on the instrument.

CAUTION

Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the instrument or other property. These precautions include, but are not limited to, the following:

Power supply/AC adaptor

- Do not connect the instrument to an electrical outlet using a multipleconnector. Doing so can result in lower sound quality, or possibly cause overheating in the outlet.
- When removing the electric plug from the instrument or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.
- Remove the electric plug from the outlet when the instrument is not to be used for extended periods of time, or during electrical storms.

Location

- Do not place the instrument in an unstable position where it might accidentally fall over.
- Before moving the instrument, remove all connected cables, to prevent damage to the cables or injury to anyone who might trip over them.
- When setting up the product, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch and disconnect the plug from the outlet. Even when the power switch is turned off, electricity is still flowing to the product at the minimum level. When you are not using the product for a long time, make sure to unplug the power cord from the wall AC outlet.
- Use only the stand specified for the instrument. When attaching it, use the provided screws only. Failure to do so could cause damage to the internal components or result in the instrument falling over.

Connections

- Before connecting the instrument to other electronic components, turn off the power for all components. Before turning the power on or off for all components, set all volume levels to minimum.
- Be sure to set the volumes of all components at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.

Handling

- Never insert or drop paper, metallic, or other objects into the gaps on the panel or keyboard. This could cause physical injury to you or others, damage to the instrument or other property, or operational failure.
- Do not rest your weight on, or place heavy objects on the instrument, and do not use excessive force on the buttons, switches or connectors.
- Do not use the instrument or headphones for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the instrument, or data that is lost or destroyed.

Always turn the power off when the instrument is not in use.

Even when the [0] (Standby/On) switch is in standby status (display is off), electricity is still flowing to the instrument at the minimum level.

When you are not using the instrument for a long time, make sure you unplug the power cord from the wall AC outlet.

Make sure to discard used batteries according to local regulations.

DMI-7 2/2

NOTICE

To avoid the possibility of malfunction/ damage to the product, damage to data, or damage to other property, follow the notices below.

■ Handling

- Do not use the instrument in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the instrument, TV, or radio may generate noise.
- When you use the instrument along with an app on your smart device, such as a smartphone or tablet, we recommend that you enable "Airplane Mode" on the device to avoid noise caused by communication.
- Depending on the condition of surrounding radio waves, the instrument may possibly malfunction.
- Do not expose the instrument to excessive dust or vibrations, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day) to prevent the possibility of panel disfiguration, damage to the internal components or unstable operation. (Verified operating temperature range: 5° – 40°C, or 41° – 104°F.)
- Do not place vinyl, plastic or rubber objects on the instrument, since this might discolor the panel or keyboard.
- Do not press the display with your finger because it is a sensitive, precision-made part.

■ Maintenance

- When cleaning the instrument, use a soft cloth. Do not use paint thinners, solvents, alcohol, cleaning fluids, or chemical-impregnated wiping cloths.

Power Requirements

Although the instrument will run either from an AC adaptor or batteries, it is recommended to use an AC adaptor whenever possible.

Using an AC Adaptor

⚠ WARNING

- Follow the precautions in the "Power Supply/AC adaptor" section on page 3.

Connect the AC adaptor in the order shown in the illustration.

⚠ WARNING

- When using the AC adaptor with a removable plug, make sure to keep the plug attached to the AC adaptor. Using the plug alone can cause electric shock or fire.
- If the plug is accidentally removed from the AC adaptor, slide it back in until it clicks into place, taking care to avoid touching any internal metal parts. To avoid electric shock, short circuit or damage, also be careful that there is no dust between the AC adaptor and plug.

The shape of the plug differs depending on your area.

⚠ CAUTION

- When setting up the product, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn the power off and disconnect the plug from the outlet.

NOTE

- Follow the order shown above in reverse when disconnecting the AC adaptor.

Using Batteries

This instrument requires six "AA" size, Alkaline (LR6)/Manganese (R6) batteries, or rechargeable Ni-MH (HR6) batteries. The Alkaline batteries or rechargeable Ni-MH batteries are recommended for this instrument, since other types may result in poorer battery performance.

⚠ WARNING

- Follow the precautions in the "Battery" section on page 3.

- 1 Make sure that the power of the instrument is off.
- 2 Open the battery compartment cover located on the instrument's bottom panel.

- 3 Insert the six new batteries, being careful to follow the polarity markings on the inside of the compartment.

- 4 Replace the compartment cover, making sure that it locks firmly in place.

Make sure to set the battery type correctly (page 10).

NOTICE

- When battery power becomes too low for proper operation, the volume may be reduced, the sound may be distorted, and other problems may occur. When this happens, make sure to replace all batteries with new ones or already recharged ones.

NOTE

- This instrument cannot charge the batteries. Use only the specified charger device when charging.
- Power will be automatically drawn from the AC adaptor if an AC adaptor is connected while batteries are installed in the instrument.

2 Use CATEGORY [<<]/[>>] or [+]/[-] to select the desired Song/Style/Voice.

You can check the Song/Style/Voice categories on the front panel.

3 Play the keyboard, or press [START/STOP] to start the Song/Style.

To stop the Song or Style, press [START/STOP] again.

* In Style playback, an Intro plays back first, and then only the rhythm part plays back, because of the Auto Intro/Ending function (page 9). Some Styles do not include a rhythm part.

* For further information on Song/Style/Voice, see page 8.

Backup and Initialization

Backup Parameters

The following settings will be maintained even if the power is turned off.

- Master Volume
- Volume Limit
- Tuning
- Chord Fingering Type
- Auto Power Off
- Battery Type

Initialization

To initialize the backup parameters, press the [Standby/On] switch while holding down the highest white key to turn the power on. “[L r ” appears on the display.

➤➤ To select and play a Voice/Song/Style, see page 6.

Voices

The Voices are the heart of the PSR-F52, letting you play 144 realistic instrument sounds (page 11) from the keyboard.

When selecting a Voice and playing the PSR-F52, the following functions are useful.

OTS (One Touch Setting; Voice No. 000)

After you've selected a Song/Style, simply selecting Voice No. 000 automatically calls up the most appropriate Voice for playing with that Song/Style.

Sustain

To turn this function on/off, simultaneously hold down [SHIFT] and press [VOICE]. When this is set to on, the Voices played from the keyboard have a long decay or sustain.

Sound Boost >> Page 9

This function is useful for playing more loudly and powerfully without using an external speaker.

Duo

When this function is on, the keyboard is split into two sections (C1–F#3 and G3–C6), with the same Voice and octave range. This is useful for playing or learning with two players (for example, a student and a teacher).

For instructions on turning this function on/off, see page 9.

"C1" or "C3," etc. are example note names. For more note names, see the illustration on page 9.

Songs

The PSR-F52 contains 69 specially recorded pieces (page 15)—for playing and practicing along with, or just for listening.

➤➤ Download the free Digital Song Book (page 5) and have fun practicing the Songs!

Use the buttons below to control playback as desired.

PAUSE/FILL — When Song playback is stopped, you can start the Song by simply playing a key.
During Song playback, you can pause/resume the Song.

TEMPO/TAP — Calls up the Tempo, letting you change the setting. >> page 7

METRONOME — Mutes the right/left track of a Song, letting you play or practice the muted part yourself. Press this button repeatedly to select the desired part for muting.
 * When both parts are muted, play either the right or left part.

Styles

The Styles give you authentic, automatic backing in a wide variety of music genres. Just play the root notes of chords with your left hand, and enjoy the accompaniment of a full band behind you!

After selecting a Style (page 6), the area of the keyboard to the left of the F#2 key becomes the "Auto Accompaniment range" and is used only for specifying the chords.

Select Style No. 65 "6/8 March" and try playing the root notes of chords with your left hand while you play a melody over the accompaniment with your right.

If You're Happy and You Know It

RIGHT: staccato F C7 F

LEFT: F C7 F

* If sharps (#) or flats (b) are written on your music score, you need to set the "⑥ Smart Chord Key" on page 9 before playing with a Style.

In Style playback, use the buttons below as desired.

PAUSE/FILL — When Style playback is stopped, you can start Style by simply playing a key.
During Style playback, you can play a Fill-in, to add rhythmic interest to your performance.
 * The PIANIST category Styles have no Fill-in sections.

TEMPO/TAP — Calls up the Tempo, letting you change the setting. >> page 7

METRONOME — Mutes the accompaniment part so that you play only with the rhythm part. To restore the accompaniment, press it again and play a key in the Auto Accompaniment range.

Intro and Ending

By default, both Intro and Ending patterns are added to the beginning and end of the Style playback automatically, because of the Auto Intro/Ending function (page 9).

If you want to add an Intro and Ending by yourself, turn off the Auto Intro/Ending function and simultaneously hold down [SHIFT] and press [START/STOP], before starting/finishing Style playback.

Chord Fingering Type >> Page 9

How you play the chords when playing Styles is called "Fingering Type." With this instrument, you can choose from two Fingering Types. The default setting is "Smart Chord."

➤➤ To use the Voice over the whole range in the Style mode, press [PART MUTE].

The Functions

To set the various Functions, press the appropriate key (repeatedly if necessary) while holding down [SHIFT].

⑫ Sound Boost	Switches the Sound Boost on/off (page 8).	Off (bof)	On (bon) / Off (bof)

Troubleshooting

Problem	Solution
When the instrument is turned on or off, a popping sound is temporarily produced.	This is normal and indicates that the instrument is receiving electrical power.
<ul style="list-style-type: none"> No Sound. The volume is too soft. 	<ul style="list-style-type: none"> Disconnect the headphones from [PHONES/OUTPUT] (page 6). Check whether the Volume Limit setting (page 9) is too low or not. Replace all the batteries with new ones or recharged ones.
The auto accompaniment of the Style does not play.	The auto accompaniment may be muted. Press [PART MUTE].
Power suddenly and unexpectedly turns off.	This is normal and the Auto Power Off function (page 9) may have been activated. If you need to disable the Auto Power Off function, select "OFF".
When the instrument is turned on, power is turned off suddenly and unexpectedly.	The protection circuit has been activated due to overcurrent. This may occur when an AC adaptor other than the one specified is used, or an AC adaptor is damaged. Use the specified adaptor (see below) only. If it should appear to be malfunctioning, please consult Yamaha service personnel.

Information for users on collection and disposal of old equipment and used batteries:

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

For business users in the European Union:

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union:

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the EU Battery Directive for the chemical involved.
